

Lowest UK Prices Guaranteed

Gold HE Combi Boiler Range

Exclusive, Highly Efficient Boilers at Unbeatable Prices

Every once in a while, a boiler range comes along which, in design and engineering terms, is "pure gold". With its advanced design and stainless steel, heat exchanger technology, the **NEW** Potterton Gold Combi HE is just such a range.

The Benefits

As millions of UK households have already discovered, a combination boiler efficiently provides all the heating and hot water required in one compact, space saving unit, without the need for a hot water cylinder or a tank in the loft.

A combi boiler heats directly from the cold mains, as and when required and supplies hot water at mains pressure, providing consistently powerful showers without the need for a pump.

The Potterton Gold boilers will immediately lower your heating bills and reduce emissions and your impact on the environment!

2 Year Warranty

These unique SEDBUK A boilers are 90.8% efficient and are available in 3 variants - 24HE, 28HE and 33HE. They are only available from 'Potterton Gold' Independently approved stockists at **guaranteed lowest prices!** Each boiler is rigorously tested to offer unparalleled performance and reliability and come with a '24 carat, solid gold' 2 year Warranty.
